ABOUT

A self-taught web developer with a strong passion for creating innovative and user-friendly web applications. I have honed my skills in both frontend and backend development. Eager to contribute my knowledge and expertise to dynamic projects while continuously expanding my skills as a Full Stack Developer.

PROJECTS

Twitter Clone – Full Stack Social Media App   *November 2023*

Complete Twitter clone made using MERN Stack

- JWT (JSON Web Tokens) for authentication
- Socket.io for real time messaging
- React router for routing
- React Query for data fetching and state management.
- Users can securely create accounts, post updates, engage with content through likes and comments, customize profiles, send private messages to other users and establish connections by following or unfollowing other users.
